Julie is a Certified Dementia Practitioner through the National Council of Certified Dementia Practitioners and is proud to be a Certified Master Trainer with the AGE-u-cate Training Institute.

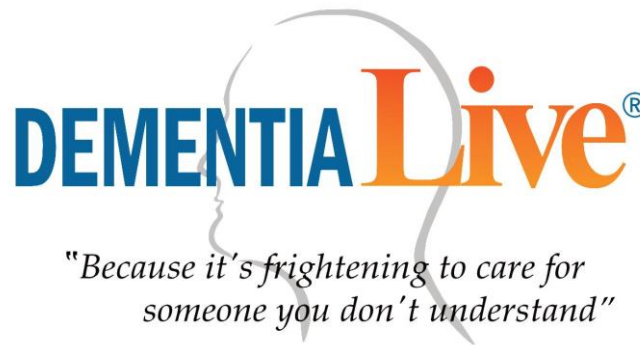

The innovative programs offered by AGE-u-cate transforms attitudes and actions by increasing awareness and understanding of age-related changes and challenges, including dementia.

Julie is a licensed nursing home administrator since 1990 and an instructor and the interim Director of Gerontology at Northern Illinois University in DeKalb, IL.

Dementia Live is a high impact, dementia simulation experience that immerses participants into life with dementia, resulting in a deeper understanding of what it's like to live with cognitive impairment and sensory change. Begin your journey to person-directed care with Dementia Live.

Compassionate Touch is an approach combining skilled touch and specialized communication that is shown to prevent behavioral expression in people with dementia and reduce job stress in care-partners. In palliative care, it provides skilled touch with compassionate presence to enhance quality of life for those in the later stages of life.

Ignite is powerful educational program that provides learners with practical tools to improve communications, respond to behavioral expressions, relieve caregiver stress and engage in meaningful activities with persons with dementia.
